Project Name	EduGenie – AI-Powered Educational Assistant	GitHub	https://github.com/theopintheo/EduGenie
Team Members	Theopin B, Antony Ragul A, Saravanan S, Karthick M	Status	Completed / working implementation

Customer Problem Statements

ID	I am	I'm trying to	But	Because	Which makes me feel
PS-1	A student / self-learner	understand difficult topics quickly	traditional material can be long or difficult	there is no single lightweight assistant for several study tasks	confused and slowed down
PS-2	A learner preparing for revision	turn long notes into useful revision material	manual summarization takes time	key ideas are buried in lengthy passages	overwhelmed
PS-3	A learner practicing	test my understanding	creating questions manually is repetitive	practice material is not always available	underprepared
PS-4	A learner starting a topic	know what to learn next	resources can feel disconnected	there is no guided sequence	uncertain about the next step

Core Problem Statement

Learners need a fast, accessible and structured way to ask questions, understand difficult concepts, summarize study material, practice with quizzes and receive a learning path without switching between multiple tools.
