

Data Flow Diagram

Date	30 September 2026	Team ID	6ab22029e880316a482c5f2a
Project Name	EduGenie – AI-Powered Educational Assistant	GitHub	https://github.com/theopintheo/EduGenie
Team Members	Theopin B, Antony Ragul A, Saravanan S, Karthick M	Status	Completed / working implementation

Level-1 Data Flow

Entity / Process	Input	Processing	Output
Learner / Browser	Question, topic or passage	Capture selected tool and input	JSON request
FastAPI Router	JSON request	Validate and route	Feature request
Feature Module	Validated request	Build learner-oriented prompt	AI prompt
AIService	Prompt	Call configured model or demo fallback	AI result
FastAPI Response	AI result	Format JSON	JSON response
Browser UI	JSON response	Render text or quiz	Learning result

Data Stores / External Services

Component	Role
.env	Stores GEMINI_API_KEY and optional model configuration.
Gemini API	External generative AI inference service.
Local source code	Feature modules, prompts, UI assets and documentation; no learner database currently required.

Flow: Learner → Browser → FastAPI → Feature Module → AIService → Gemini/demo fallback → FastAPI → Browser → Learner.
