

Solution Requirements

Date	30 September 2026	Team ID	6ab22029e880316a482c5f2a
Project Name	EduGenie – AI-Powered Educational Assistant	GitHub	https://github.com/theopintheo/EduGenie
Team Members	Theopin B, Antony Ragul A, Saravanan S, Karthick M	Status	Completed / working implementation

Functional Requirements

S.No	Category	Requirement	Priority
1	User input	Accept validated question, topic or study passage.	High
2	Q&A	Return direct learner-friendly answers.	High
3	Explanation	Break down topics with analogy and takeaways.	High
4	Summarization	Reduce long notes to concise study material.	High
5	Quiz	Generate three MCQs with four options and a correct answer.	High
6	Learning path	Generate beginner-to-advanced learning recommendations.	High
7	API	Expose REST endpoints and OpenAPI documentation.	High
8	Validation	Reject empty/oversized requests and return useful errors.	High

Non-Functional Requirements

Category	Requirement
Usability	Simple workspace, clear labels and readable results.
Responsiveness	Layout adapts to mobile and desktop widths.
Maintainability	Feature logic separated into focused Python modules.
Security	API key stored in environment variables, never source code.
Reliability	Demo fallback supports UI/endpoint development without live inference.
Extensibility	Architecture can add authentication, history, multilingual output and progress tracking.
