

Problem-Solution Fit

Date	30 September 2026	Team ID	6ab22029e880316a482c5f2a
Project Name	EduGenie – AI-Powered Educational Assistant	GitHub	https://github.com/theopintheo/EduGenie
Team Members	Theopin B, Antony Ragul A, Saravanan S, Karthick M	Status	Completed / working implementation

Canvas Element	EduGenie Content
Customer Segment(s)	College students, school learners, self-learners and beginners.
Problems / Pains	Complex explanations, lengthy notes, limited practice questions and uncertainty about learning order.
Triggers	Exam preparation, difficult topic, revision deadline, new subject.
Emotions Before / After	Before: confused/overloaded. After: clearer/more confident.
Available Solutions	Search/videos offer breadth but require filtering; textbooks offer depth but can be slower; generic chatbots are flexible but may lack structured workflows.
Customer Limitations	Time, attention span, device resources, connectivity and varying technical knowledge.
Behavior	Frequent short study sessions; high need during revision periods.
Channels	Browser, laptop/desktop and future mobile app.
Root Cause	Learning content is fragmented and often not adapted to the learner's immediate task or level.
Your Solution	One modular AI workspace for Q&A, explanations, summaries, quizzes and learning paths.
